

# Northern Hi Lights

It was a great turnout at the Fort St. John Airshow, where the NLC Recruitment Team had a booth set up.

## AME takes flight at Airshow

The Northern Lights College (NLC) Recruitment Team has been busy over the summer, attending and hosting various events throughout the northeast.

One event they attended was the Fort St. John Airshow.

"The event was great. There were a lot of people there," said Tricia Hotchkiss, Student Recruiter Lead. "It was definitely very busy."

The Recruitment Team, as well as Aircraft Maintenance Engineering (AME) instructor Dan Jaeger and some of his students, set up several tables with

information and activities for attendees to enjoy.

"There was lots of interest in our two turbine engines from industry professionals," said Braden Scavarelli, Student Recruiter. "As well, kids loved our 'work without your eyes' experiment, simulating what an Aircraft Maintenance Engineer may encounter."

The crowd was enthusiastic, and happy to see NLC on the tarmac.

"People were pleased to see that NLC was there representing the other side of the aviation industry, that being Aircraft

Maintenance Engineering," added Scavarelli.

With lots of questions about the AME program, Jaeger and his students were pleased to weigh in.

"Many young individuals and mature professionals were curious in regards to our curriculum," said Scavarelli.

With another great event under wraps, the Recruitment Team is getting ready for a busy fall season.
