In 2003, DCH Foundation secured the funding to provide a Bone Densitometer for the regional population. Used to measure bone density, this equipment will diagnose the silent, progressive disease that is Osteoporosis.

Thank You

Hill Computing Inc. would like to say a special thank you to all the super people that participated in the photographs. Taking time out from your busy schedules is truly a show of support to our local foundations. To Lee Fast, Sue Popesku, and Lillian Hay, great work assisting with organizing, obtaining props, and gaining momentum within the staff.

To our advertisers, your support for this project is very appreciated. Without your help this project wouldn't have succeeded.

To Don Pettit of photoGraphics, great work amidst confusion and chaos, and Jesh de Rox, countless hours designing the calendar have really paid off. Your contribution was exceptional.

SUNDAY MONDAY TUESDAY WEDNESDAY THURSDAY FRIDAY SATURDAY

The DC Hospital boasts a state-of-the-art CT Scanner and software package valued at 1.6 million dollars. The Dawson Creek Hospital Foundation raised and contributed just over \$500,000 towards this purchase. This is really quite a phenomenal accomplishment for our small population base.
